

European Meteorological Society Conference Copenhagen September 9-13th 2019

Call for abstracts for session OSA1.10

Challenges in High Resolution Short Range NWP at European level including forecaster-developer cooperation

Deadline: April 12th

<https://meetingorganizer.copernicus.org/EMS2019/abstractsubmission/>

The session will cover various aspects of scientific and operational collaboration related to NWP models and will include assessment of how European consortia can work together on common challenges in developing high resolution mesoscale models even at the sub-kilometre scale.

Examples of topics for this session include:

- ✓ Past and future activities related to the C-SRNWP Module of EUMETNET and other EUMETNET activities with a relevance to SRNWP
- ✓ NWP user/developer interactions
- ✓ Observation impact studies
- ✓ Development of the Global Lake Database and the Surface Data Pool
- ✓ Collaboration on post-processing for EPS systems

Abstracts for oral and poster presentations on all relevant topics are welcome!

Session Conveners: Balázs Szintai (OMSZ, Hungary)
Chiara Marsigli (DWD, Germany)
Emily Gleeson (Met Éireann, Ireland)
